

CODE: QD35

DIGITAL CALENDAR CLOCK

FEATURES:

This fully digital calendar clock has the option of a 12 or 24 hour time display that can be read from 15 meters distance. A classic design, the QD35 is easy to view and is supplied with a removable stand, allowing it to be freestanding or wall mounted. Like all our calendar clocks, the QD35 is useful wherever people are completing forms and as a reminder for the day of the week for people with memory loss.

The QD35 includes a reliable German movement and an automatic calendar function that self-adjusts for leap years. The flip card display remains readable under fluorescent lighting, unlike many LCD clocks.

IDEAL FOR:

Banks and Post Offices • Waiting Rooms • Emergency Services • Call Centres • Memory Assistance

HEIGHT 215 mm
