

CODE: R58

RESERVE POWER
DIGITAL CLOCK 24hr

FEATURES:

This mains powered digital clock has the capacity to go 10 days without power, making it ideal for critical situations where power supply is erratic. With its large face and 24 hour format the R58 can be read from 25 meters away. It is supplied with a powerful Nicad battery, 1.5 m power cord with plug and can be hard-wired into mains power by an electrician.

Features include a reliable German movement and an indicator light when the clock is operational. The flip card display remains readable under fluorescent lighting, unlike many LCD clocks.

IDEAL FOR:

Open Plan Offices • Hospitals • Emergency Services • Call Centres • Warehouses • Locations with Intermittent Power Supply

HEIGHT 181 mm
WIDTH 313 mm
DEPTH 118 mm
WEIGHT 1.2kg
NUMERAL HEIGHT 58 mm

*Built in Nicad battery will keep functioning
for 10 days without power*
