

CODE: CT-4D6NR

Outdoor LED Clock/Timer

SPECIFICATIONS:

WIDTH 580 mm
HEIGHT 200 mm
DEPTH 50 mm
WEIGHT 3.1 kg

240v MAINS POWER

Remote Battery CR2032 (supplied)

A large outdoor LED digital clock with multi-timer functions. The 152 mm numerals can easily be read from 50 metres distance. Ideal for sports events, swimming pools and large warehouses.

Numerals are made from individual LED's. When viewed closely they look blurry but at a distance they look solid and remain bright in daylight - similar to LED traffic lights. The anti-glare acrylic lens allows for clear viewing from all angles. The aluminium outer case can sit flat on a surface or be wall mounted.

Function settings include: 12 or 24 hr time, Count-up/Count-down timer to 99m 59s, Stopwatch, Tabata Timer, FGB Timer and Interval Timer.

The mains-powered unit incorporates an internal ni-cad battery to maintain settings during power outages. A remote control is supplied with the clock - additional remotes can be purchased separately.
