WIRELESS CHARGING

Place your IPhone (8 or above) or Android phone on the main unit to start charging. Note the clock needs to be plugged into mains power to charge the phone.

TROUBLESHOOTING

Bluetooth won't work with my phone..

On the clock, check that Bluetooth is turned on **LONG Press** the "ON/OFF" button and an **upward tune** should sound. After about 6 seconds another beep will sound from the speakers to show it's activated.

In the settings on your device select "BLUETOOTH" and check to see "**WOOD SHOW SPEAKERS**" is on. You may need to allow access to your local network in settings.

Choose an audio app on your device (Spotify, Apple Music, YouTube Music, Audible etc) and press play. If no sound comes out, check the volume is up on your device.

To change the sound quality adjust the settings in the app on your device.

The screen has gone blank

The clock is set to Power Saving Mode and can be reactivated by a loud voice or clap. To turn this function off **SHORT Press** the "DOWN" button on the back to this setting **--:Sd**

The alarm won't work

Look for a white dot between the time and temperature to see if alarm is set. If it is blank, follow the setting instructions for Alarm.

If the settings are in a 12hr format, check that the alarm is set for AM or PM (a dot to the left of the time will appear indicating PM time)

Check the **alarm is on on:A1** not **off** **--:A1**

To turn it on toggle with the UP/DOWN buttons while in the settings section
